Syed Yaqoob Ali

Junior Software Developer

A motivated, hard-working team player who communicates well and works well under pressure. My previous work experience has enabled me to develop skills including team work, maintaining a positive attitude under pressure, ability to communicate well with people, working in a professional environment and good attention to detail.

Recently enrolled in a Digital Skills Bootcamp at JustIT Training to improve my skills further and grasp a better understanding of software languages (HTML, JavaScript and Python), as well as working on my portfolio to create some personal projects.

I aspire to pursue a career in software development, I would like to work as a Junior Developer to gain more skills and experience. I thrive working in a challenging environment to push my skills and limit to further my knowledge in this field.

Software Development Skills: Python and MySQL

Web Technology: HTML5, CSS3 & JavaScript

Core Programming Languages: JavaScript and Python

Projects: (All projects can be found on github and on portfolio)

- An interactive e-commerce cart using HTML and CSS but mainly JavaScript
- A live-score football app that has a API integrated to fetch live time and score updates
- Created a website clone of Disney+ using HTML, CSS and JavaScript
- Created a database for a (enter here) and implemented it on their website to help customers view their products.
- Created a database for (enter here) using python

Experience

2023

Just IT | Remote

Software Development Bootcamp

Recently, I completed an intense 12 week boot camp with Just IT, this experience has taught me a range of programming languages that now allows me to understand the fundamentals to progress and expand my knowledge in both front-end and in back-end software development. I go into more depth in the following page, however I have learnt how to build the structure of a website using HTML. style the page using CSS and make features interactive and function with JavaScript. As well as learning how to build databases using MySQL and python.

2023

Step Into Teaching | Duke's Aldridge Academy

Math Mentor

At Dukes I was able to apply my previous experience in tutoring Mathematics and apply it to a school environment where I was able to confidently teach and support students who were not reaching their targets. Working in a school environment can be challenging and it has built my resilience and patience mostly, to continue to persevere regardless of the challenges I may face. I worked with many students with a range of ability and behaviour, this meant I had to adapt to the needs of every student and tailor my approach to the best standard. I also built confidence to deliver in front of large groups and perform to the best of my abilities under pressure.

Programming Languages & Frameworks

- HTML5
- CSS3
- JavaScript
- React
- Tailwind
- MySQL
- Python

References

Available on request

2022

Primark | Wood Green

Customer Assistant

I gained many skills such as:

financial - dealing with returns, exchanges and working tills

people management - helped customers with approaches that best suited the situation

communication - working with a team to get tasks done

problem-solving skills and confidence to solving issues that occurred in the store.

2020-2022

Forward Security

Security

Working with Forward Security I gained valuable experience in stewarding at stadiums. I was able to acquire experience in dealing with situations at hand on my own with the knowledge and procedures I had been taught. I also gained more experience in working and cooperating as a team to maintain the safety of the people and colleagues.

2018-2023

Independent | London

Mathematics tutor

- Working with students ranging from 8-15 years old, I've learnt to adapt my teaching styles for the different key stages.
- Teaching students of various levels, helped developing patience and being persistent

2016

Caledonian Pharmacy | Caledonian Rd

Pharmacist Assistant/ Shadow

- understanding of key points of health and safety standards used within the industry.
- shadowing tasks that were within my capabilities
- Ensuring a good customer experience,
- Managing and restocking shop floor,
- using tills to serve customers.

2015-2018

Asian Food Store | St. Albans

Customer Assistant

- Ensuring a good customers experience,
- Maintaining and replenishing stock
- Tills
- Working as part of a team
- communicating with colleagues as well as dealing with customer queries in a polite manner.

Hobbies

- Playing and watching football, I continue to play at a social level
- Going gym, keeping active at the gym helps keep the body physically as well as mentally fit
- I enjoy puzzles and mental games to keep my mind active and tested
